PREFACE

This edition of the Florida Library Directory contains statistical data for FY 1988-89. It includes address listings as supplied by public, academic, institution and special libraries, and by district school media centers. A name index is included in the back. The collection and computerization of the statistical data and address listings for production of this year's Directory was performed by E. Walter Terrie of the Florida State University, Center for the Study of Population, who was assisted by Ed Schafer.

Statistical information was compiled from the annual reports submitted by cooperating public and institution libraries. The state of Florida participates in the Federal/State Cooperative Public Library Data System sponsored by the National Center for Education Statistics which builds on earlier projects sponsored by the United States Office of Education Research and Improvement and the American Library Association's Office of Research. This year's survey supports Florida's participation in this project.

In using the data, it should be noted that population figures are from the Florida Estimates of Population, University of Florida which contains estimates of the population of areas as of April 1, 1989, and which estimates the permanent resident population only. Total population served by public libraries as reported in statistical tables 1, 6 and 7 adds to more than the total population of Florida. This is because some municipal libraries and county libraries serve the same population group.

Appreciation is expressed to all of the State Library staff who helped with the compilation of the Directory and especially to the Bureau of Library Development staff, John Boynton, Helen Moeller, and the Bureau of Interlibrary Cooperation staff. Also to Sandra Ulm of the Florida Department of Education who edited the school media center section.

A special note of appreciation is due to the librarians of Florida whose cooperation makes this publication possible.

STATISTICAL ANALYSIS FOR PUBLIC LIBRARIES
1988-1989

Data is compiled from annual survey forms submitted by public libraries in late 1989. Except in cases of obvious inconsistencies where changes were made in consultation with the libraries concerned, the information is published as submitted.

The survey requests information that is not reported in the Tables. This information is kept on file at the State Library. Librarians may request information from these files at any time during the year.

Florida public libraries circulated 50,303,509 items to 4,873,501 registered borrowers through 1,114 service outlets.

Florida public libraries have 914 librarians who have earned a master's degree in library science. Additional staff total 3,213 and there are 445 regularly scheduled volunteers. All numbers for staff are expressed in full-time equivalents.

The libraries offered 18,173,367 books plus 5,654,060 volumes of other types of materials to 13,156,114 residents, or 1.81 volumes per capita. Because some residents are served by more than one library, the number of residents served exceeds the population of Florida. This does not mean that every resident of Florida receives free library service. (See Status of Library Development 1990, page 179.) Circulation per capita was 3.82. The figures for FY 1988 were 1.75 volumes per capita and 3.61 volumes per capita circulated. Approximately 18,155,437 reference questions were asked. This represents 1.38 questions per capita, and each item cirulated at average of 2.11 times during the year.

Revenue for FY 89 totaled $177,817,277 and was received from four main sources: Local (municipal and/or county governments) 81%; State of Florida 6%; Federal government 2%; and other 11%.

Libraries report total operating expenditures of $156,904,597 or $11.93 per person. In FY 88, the figure equalled $10.69 per capita.

Population projections were taken from Florida Estimates of Population, April 1, 1989, State, Counties and Municipalities prepared by the Population Program, Bureau of Economic and Business Research, University of Florida, February 1990. In a few instances, adjustments were made when the geographic area served did not correspond to county or municipal boundaries.
